

Bruny Island Battery Trial

ATA branch meeting April 2017

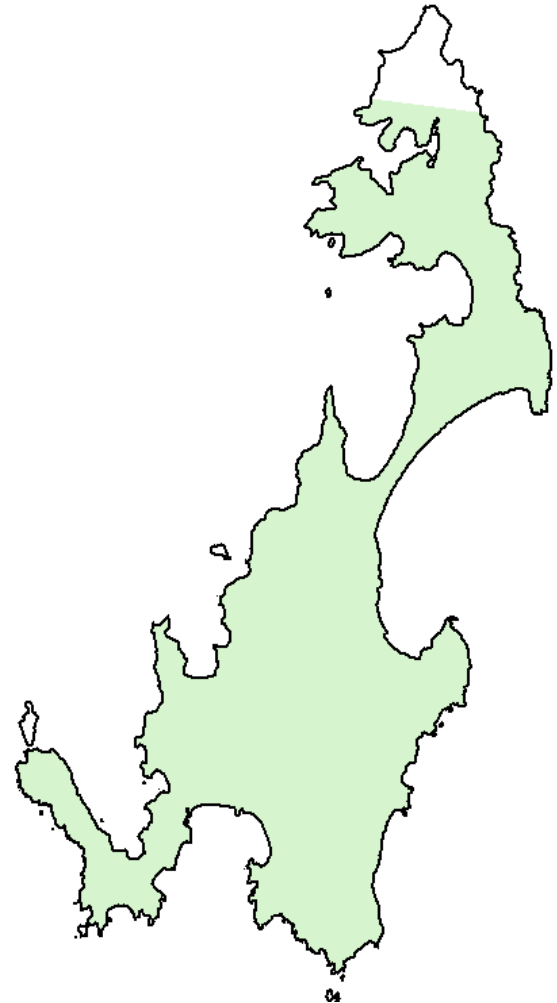

A vision

“In the future customers have batteries. When we have a network problem the solution is already there, we just need to start paying customers to solve it for us”

Trial on a page

- 3 year research/2 year trial
- Manage cable load and Diesel use
- Collaboration: ANU, USyd, UTAS, Reposit Power, TasNetworks
- ~150 kW battery capacity
- ~40 customers

Customer Choice

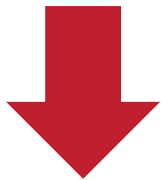

Subsidy

\$17,200 maximum subsidy

\$3,200/kW battery power

\$2,000 minimum contribution
